

Accora

Product guide

Welcome

Accora is home to a team bursting with innovation and enthusiasm. We operate in the healthcare marketplace, creating and realising products for clinicians and care providers.

Our customers tell us they want products that are clinically effective at a price they can afford. By the way, we also know you want great customer service and products that go on and on and on.

Our services

Joint visits

We offer joint visits nationwide at your service user's home, giving the opportunity to try any of the Accora products.

Our Product Specialists work with the prescriber to produce the best solution to meet the service user's requirements. If we believe that our products do not meet the clinical need, we'll advise the prescriber and suggest an alternative supplier.

Learning & development

We offer a wide variety of training sessions. For further details see page 10-11.

Professional support

Accora is dedicated to supporting professionals in finding appropriate solutions for their clients. Our clinical experts are available for training and education opportunities but also to provide individual advice on a case-by-case basis. Our team of experts can support clinicians with clinical reasoning and justification relating to product requests. They can also advise on managing clinical responsibilities.

Customer service

Accora's customer service team pride themselves on delivering an excellent customer service experience. Whether you need to request a quote, get an update on an order, enquire about a product, or book a joint visit they'll be pleased to help.

Our clinical experts

Jenny Rolfe

Occupational Therapist
jenny.rolfe@accora.care

Jenny is a senior OT, who has been practising since 1997, and completed her MSc in Neuro-Rehabilitation in 2007. Her expertise lies in postural management and assessment.

Debra Dunitz

Occupational Therapist
debra.dunitz@accora.care

Debra qualified as an OT in 2006, and uses her wide range of clinical knowledge and experience to inform product development, and to provide clinical training on our product range.

Jayne Brewer

Occupational Therapist
jayne.brewer@accora.care

Jayne qualified as an OT in 1996 and has a wide range of clinical experience in acute and community settings. Her recent experience has been in community equipment stores providing training and support to prescribers and commissioners.

Heidi Sandoz RN BSc Hons
Tissue Viability Consultant

Heidi has been practising as a Tissue Viability Nurse since 2002. She has experience in both acute and community care, and her passions centre around education, improving services for patients and team development.

Sarah Thompson RN, BA Hons
Tissue Viability Nurse Specialist
sarah.thompson@accora.care

Sarah has been a Tissue Viability Nurse since 2010, gaining a vast amount of experience within wound care from the primary, secondary, and private sector. She prides herself in positive patient outcomes by utilising a patient-centred approach to their care.

Learning & development

Complement your learning journey with a variety of free training sessions. Certificates are available for all our regular training sessions.

Monthly webinars

Accora hosts clinically-based webinars once a month which are free to join. Our in-house clinical team are joined by a range of presenters who are experts in their field, providing education on a range of topics. This ranges from topics specific to our products, to wider points of discussion in the field of occupational therapy.

Key areas of focus for the webinar programme are:

- Posture management
- Pressure care
- Moving and handling
- Infection control
- Legal
- Mental health and wellbeing

Visit our website to browse for recordings of our past sessions and register for upcoming sessions, or email for further information.

Clinical education programmes

Alongside our ongoing webinar programme, we also provide modular courses which run over several months, enabling more in-depth training into specific subjects such as tissue viability and complex disability management.

Visit our website to browse recordings of our past sessions and register for upcoming sessions, or email for further information.

Online clinical forums

Accora offer a variety of free online forums where healthcare professionals can openly share experience and knowledge and gain support from their peers.

For further information, please email debra.dunitz@accora.care

Face-to-face sessions

These sessions allow the opportunity to explore the range of products including chairs, beds (including junior and FloorBeds), and mattress range.

Lunch and Learn sessions

We also offer short 45-minute sessions, with lunch provided, concentrating on specific subjects such as a clinical case study, clinical justification, or the clinical application of a specific product. These sessions are either carried out online or face-to-face, and can be adjusted to suit your team's specific training needs.

If you are interested in seeing the sessions currently available, or to create your bespoke training package, please email learninganddevelopment@accora.care

Measuring for seating

Measuring users:

Seat depth:

- The most important measurement
- If the person measures 20", select a 20" seat depth (don't add or remove anything as a general rule)
- If in doubt – be generous – it is easier to decrease the seat depth later than increase it
- Ensure user is in an upright position as far as possible – sacral sitting
- Using a pen behind the user's knee can be helpful

Seat height:

- The second most important measurement
- Consider user's normal footwear and its impact on seat height
- If the person measures 18", select a seat height of 18" (don't add or remove anything as a general rule)

Seat width:

- The third most important measurement
- Measure 'across' not 'around the abdomen'
- Use caution with fabric tape measures
- Use a book either side of the person as a visual clue

Measuring plus-size users:

Seat depth:

- Measure excluding gluteal shelf
- Take into account weight around back of calf
- Accommodate gluteal shelf by removing stuffing from bottom cushion

Seat height:

- Measure from bottom of thigh to floor – not popliteal fossa to floor

Seat width:

- Use any existing seating as a guide
- Consider implications on transfers
- Consider implications on posture support
- Consider if the user's weight may change
- Not necessarily hip to hip, depending on weight distribution

Seating

Clinical rationale for features on our chairs

We have outlined a brief summary of the clinical benefits for each of the specific features on our chairs, to help guide you in your choice of product to meet a specific user's needs. Adjustable features allow the chairs to be recycled more easily, as they can be set up correctly for a new service user's needs. These are definitions, and do not replace the need for a thorough seating and product assessment.

Tilt-in-space

The backrest angle remains fixed and the whole chair tilts, reducing the effect of gravity on users who cannot hold themselves upright, enabling them to maintain a good posture and reducing the risk of pressure injury.

Backrest recline

The backrest angle can be increased, resulting in a more open hip angle when seated. This can be used where the user has reduced hip flexion, or to augment tilt-in-space in offloading the effect of gravity to support posture.

Adjustable footplate

Height adjustment ensures the user maintain a good posture and weight bear through their feet, spreading load and reducing the risk of pressure injury. Angle adjustment accommodates and supports the position of the feet.

Adjustable seat height

The seat height must allow the user to maintain a good posture and weight bear through their feet, spreading load and reducing the risk of pressure injury.

Legrest elevation

Raising the legs can help with the management of oedema and aid comfort.

Adjustable armrest height

Elbow and forearm support is important for maintaining good posture, ensuring the user is not leaning down or lifting their shoulders uncomfortably.

Waterfall backrest

Three fibre-filled pillows which can be individually adjusted to accommodate and support the spinal shape.

Flat rise

Raising the service user without tilting, aiding transfers where the user is unable to manage the traditional motion of a riser. Particularly useful for users with muscular dystrophy and Parkinson's.

Adjustable seat depth

The seat depth should be such that the pelvis is at the back of the seat, and the thighs are completely supported.

Cocoon backrest

A single fibre-filled cushion with multiple sections, designed to support a kyphotic spinal shape and adjustable to accommodate more asymmetrical back profile shapes.

Standard rise

Assists the user with sit-to-stand transfers.

Adjustable seat width

The seat width should be such that the user can reach the armrests easily, and there is no pressure on their hips.

Lateral support wedges

These wedges can be added under any backrest cushions to provide lateral support, helping to accommodate, support or correct a scoliosis.

Configura[®]

Specialist seating for community equipment stores

- Easy adjustment of size, pressure and posture requirements before and after delivery
- Easy to recycle and reissue
- Reduces costs

A revolutionary way of issuing seating

The **Configura** chair range by Accora introduces a revolutionary way of issuing seating which is saving many departments time, effort, and money. Here's how it works:

Configura® Lite 2

The entry-level chair with tilt-in-space

The Lite 2 is the most cost-effective chair in the **Configura** range, featuring a single motor tilt-in-space mechanism, height and depth adjustment and a high-risk pressure cushion as standard.

Beds

Scan to view our beds channel

Clinical rationale for features on our beds

We have outlined a brief summary of the clinical benefits for each of the specific features on our beds, to help guide you in your choice of product to meet a specific user's needs. These are definitions, and do not replace the need for a thorough assessment of your user's needs.

The features below are standard on all Accora beds:

Backrest with auto-regression

Enables independence, assisting with transfers, bed mobility, and positioning. The auto-regression mechanism reduces shear, aiding comfort.

Kneebreak profiling

Elevating the legs aids with pressure management and bed positioning, stops the user slipping down the bed, and reduces fluid build-up in legs and ankles.

Compact motor system

The compact motors and wires are fitted within the bed frame, allowing easier hoist access and preventing damage.

Compatible with most mattress systems

The standard mattress platform size is 2000 x 900 mm, which is compatible with a wide range of mattresses.

Compatible with Junior Kit

The accessory kit that makes all Accora beds suitable for children.

Additional features:

Ultra-low function

Transforms a bed fall into a roll, reducing the impact and therefore risk of injury, and reducing the requirement for side rails.

The ultra-low height reduces the risk of slipping when sat on the edge of the bed, and reduces the amount of strength and range of movement required when lifting legs into bed, eliminating the need for manual handling equipment and enabling independent transfers for some users.

Rises to 800 mm

Enables taller carers to complete care tasks at an appropriate height for them.

Trendelenburg

Tilting the foot end higher than the head end can help when positioning the user, and can be combined with other profiling functions to reduce sliding down in the bed.

Anti-Trendelenburg

Also known as Reverse Trendelenburg, tilting the head end higher than the foot end can be combined with other profiling functions to obtain an upright seated position in bed.

FloorBed®

Bed fall, or bed roll?

- Reduce the risk of injury in the event of a user fall
- Reduce the risk of caregiver injury
- Enable independence and mobility

FloorBed¹

The first truly floor-level nursing bed

A genuine game-changer since its introduction, **FloorBed 1** lowers to a height of just 71 mm and features a maximum lifting height of 650 mm. With a focus on keeping users safe and enabling independence, the bed is easily configurable to meet varied and changing user needs with a wide range of accessories.

Additional features:

Ultra-low function

Trendelenburg

Anti-Trendelenburg

Overall dimensions	925 x 2255 mm (36.4" x 88.8")
Mattress size	900 x 2000 mm (35.4" x 78.7")
Safe working load	185 kg (29 st, 408 lbs)
Patient weight	150 kg (24 st, 330 lbs)
Lifting range	71 – 650 mm (2.8" – 25.6") (excl. mattress)
Profiling functions	Backrest with Auto-regression, Kneebreak, Anti-Trendelenburg, Trendelenburg
Min. height of service user	1460 mm (57.5")
Part number	NSB-0-FL1-200

FloorBed²

Combining floor level functionality with increased height for care giving

The **FloorBed 2** lowers to 71 mm, and has an increased maximum height of 800 mm, offering a safer working height for taller carers. The low head and footboard enable easier access for care tasks and repositioning.

Additional features:

Ultra-low function

Rises to 800 mm

Trendelenburg

Anti-Trendelenburg

Overall dimensions	935 x 2285 mm (36.8" x 90.0")
Mattress size	900 x 2000 mm (35.4" x 78.7")
Safe working load	185 kg (29 st, 408 lbs)
Patient weight	150 kg (24 st, 330 lbs)
Lifting range	71 – 800 mm (2.8" – 31.5") (excl. mattress)
Profiling functions	Backrest with Auto-regression, Kneebreak, Anti-Trendelenburg, Trendelenburg
Min. height of service user	1460 mm (57.5")
Part number	NSB-0-FL2-200

FloorBed¹ Plus

Designed for the plus-size user

FloorBed 1 Plus is 15 cm wider than a standard 90 cm wide bed, giving the plus-size user more space without going to the full width of a bariatric bed.

Additional features:

Ultra Low function

Trendelenburg

Anti-Trendelenburg

Overall dimensions	1075 x 2255 mm (42.3" x 88.8")
Mattress size	1050 x 2000 mm (41.3" x 78.7")
Safe working load	260 kg (41 st, 573 lbs)
Patient weight	225 kg (35 st, 496 lbs)
Lifting range	78 – 650 mm (3.1" – 25.6")
Profiling functions	Kneebreak, Anti-Trendelenburg, Trendelenburg
Min. height of service user	1460 mm (57.5")
Part number	NSB-0-FL5-100

FloorBed accessories

All FloorBeds are available with a range of accessories, detailed below:

Integrated padded side rails

Head and foot board bumpers

High safety mat, 220 mm high
Same height as FloorBed with 150 mm foam mattress

Safety sleeve

Reduces risk of entrapment as the platform mechanism is protected

Bed lever

Assists with bed mobility

Lifting pole

Assists with bed mobility

Mattress infill

Bed extension kit

Increases mattress platform length to 2200 mm

Pump holder

Holds the pump of an alternating air mattress

CommunityBed

The low nursing bed designed for the community

Increased weight capacity of 180 kg and lifting range of 220 mm to 800 mm, allowing you to simplify your range and reduce stock holding, while still offering the flexibility that you need to meet the needs of service users.

Additional features:

Rises to 800 mm

Anti-Trendelenburg available with alternative handset

Trendelenburg available with alternative handset

Overall dimensions	930 x 2250 mm (36" x 89")
Mattress size	900 x 2000 mm (36" x 79")
Safe working load	215 kg (34 st, 474 lbs)
Patient weight	180 kg (28 st, 396 lbs)
Lifting range	220 – 800 mm (8.6" – 31.5")
Profiling functions	Backrest with Auto-regression, Kneebreak, Anti-Trendelenburg, Trendelenburg
Min. height of service user	1460 mm (57.5")
Part number	NSB-0-CB1-100

CommunityBed features and accessories

Features

Lowest position at 220 mm

Easy to use handset*

*Upgraded handset required for Trendelenburg function

Excellent height for carers

Backrest with auto-regression and knee profiling

Accessories

Other accessories are available including **Junior Kit**.

Bed lever

Integrated padded side rails

JuniorBeds

The accessory kit that makes all Accora beds suitable for children

This accessory kit is a simple, safe and cost-effective solution that is compliant with the BS EN 50637:2017 children's bed standard. It comprises of head and footboard bumpers, which reduce impact, and a safety sleeve, reducing the risk of entrapment.

Please note: side rails are an optional extra

	Kit includes	Part number
FloorBed 1 JUNKIT-0-FL1-000	Bumpers	BHMNE-0-FL4-000
	Safety sleeve	SLE-0-FL4-100
FloorBed 2 JUNKIT-0-FL2-000	Bumpers	BHMNE-0-FL4-500
	Safety sleeve	SLE-0-FL4-100
	Protection plates	PROPL-0-FL4-500
CommunityBed JUNKIT-0-CBI-000	Bumpers	BHMNE-0-FL4-000
	Safety sleeve	SLE-0-FL4-100

JuniorBed accessories

Only these accessories are compatible for use with **JuniorBeds**.

Fabric side rails

With easy lock and lower mechanism. Fabric mesh allows visibility from within and outside the bed.

Comfort FirmEdge mattress

Designed with a firm edge to help further reduce the risk of entrapment.

Extended surface

When used with the bed at floor-level, the high safety mat provides an extended surface to safely roll onto.

Integrated bolster

Forms in-built mattress infill. Side rails lower to below mattress height to facilitate transfers.

Easier transfers

Also helps service users orientate themselves in bed and can make transfers easier.

High safety mat

Helps reduce the risk of injury from bed falls for someone who is prone to falling.

Choosing the right bed

Following these steps here will guide your choice of bed.

Is your service user someone who:

- is more than 1460 mm tall?
- weighs more than 40 kg?
- has a BMI of more than 17?

Yes

Consider standard Accora bed that meets BS EN 60601-2-52

CommunityBed

No

Is your service user less than 750 mm tall?

Yes

Consider a crib or alternative product

No

Does your service user require high side rails (over 450 mm high from mattress platform)?

Yes

Consider a cot or alternative product

FloorBed 1

No

Consider **CommunityBed** or **FloorBed** with **JuniorKit** to meet children's standard BS EN 50637:2017

FloorBed 2

JuniorBed technical specification

	CommunityBed	FloorBed 1	FloorBed 2
Overall dimensions	930 mm width x 2250 mm length (36" x 89")	925 mm width x 2255 mm length (36.4" x 88.8")	935 mm width x 2285 mm length (36.8" x 90")

Note: JuniorBeds can only meet the new children's standard when installation of the full JuniorKit is complete, as specified here * alternative handset required			

JuniorBeds

Children's standard

The children's standard (BS EN 50637:2017 – Medical electrical equipment – Particular requirements for the basic safety and essential performance of medical beds for children) is a standard for medical beds suitable for children.

Why was it introduced?

Adult beds have an intended service user group which is defined as below (adult standard is BS EN 60601-2-52):

- Over 40 kg
- Over 1.46 m in height
- With a BMI of more than 17

Anyone outside these dimensions, particularly children, therefore fall out of this user group.

Key differences from the adult standard:

The main difference in the standard is the size of the gaps between side rails, mattress platform, and closing gaps. These are much smaller than with adult beds. There are also extra tests that must be conducted on the bed to enable it to meet the standard, that are not required on the adult bed.

How will it affect me?

Manufacturers must meet these standards to be able to state that their beds are suitable for children. For Local Authorities, this means that when issuing beds for children, or those who are outside of the intended service user groups for adults, an appropriate bed must be used.

What has Accora done to meet the standard?

Accora have developed a safe, simple, cost-effective solution for our beds to enable community equipment stores / prescribers to be able to comply with the new BS EN 50637 standard. Please contact us for more information and we'll be happy to discuss this in further detail with you.

Pressure care

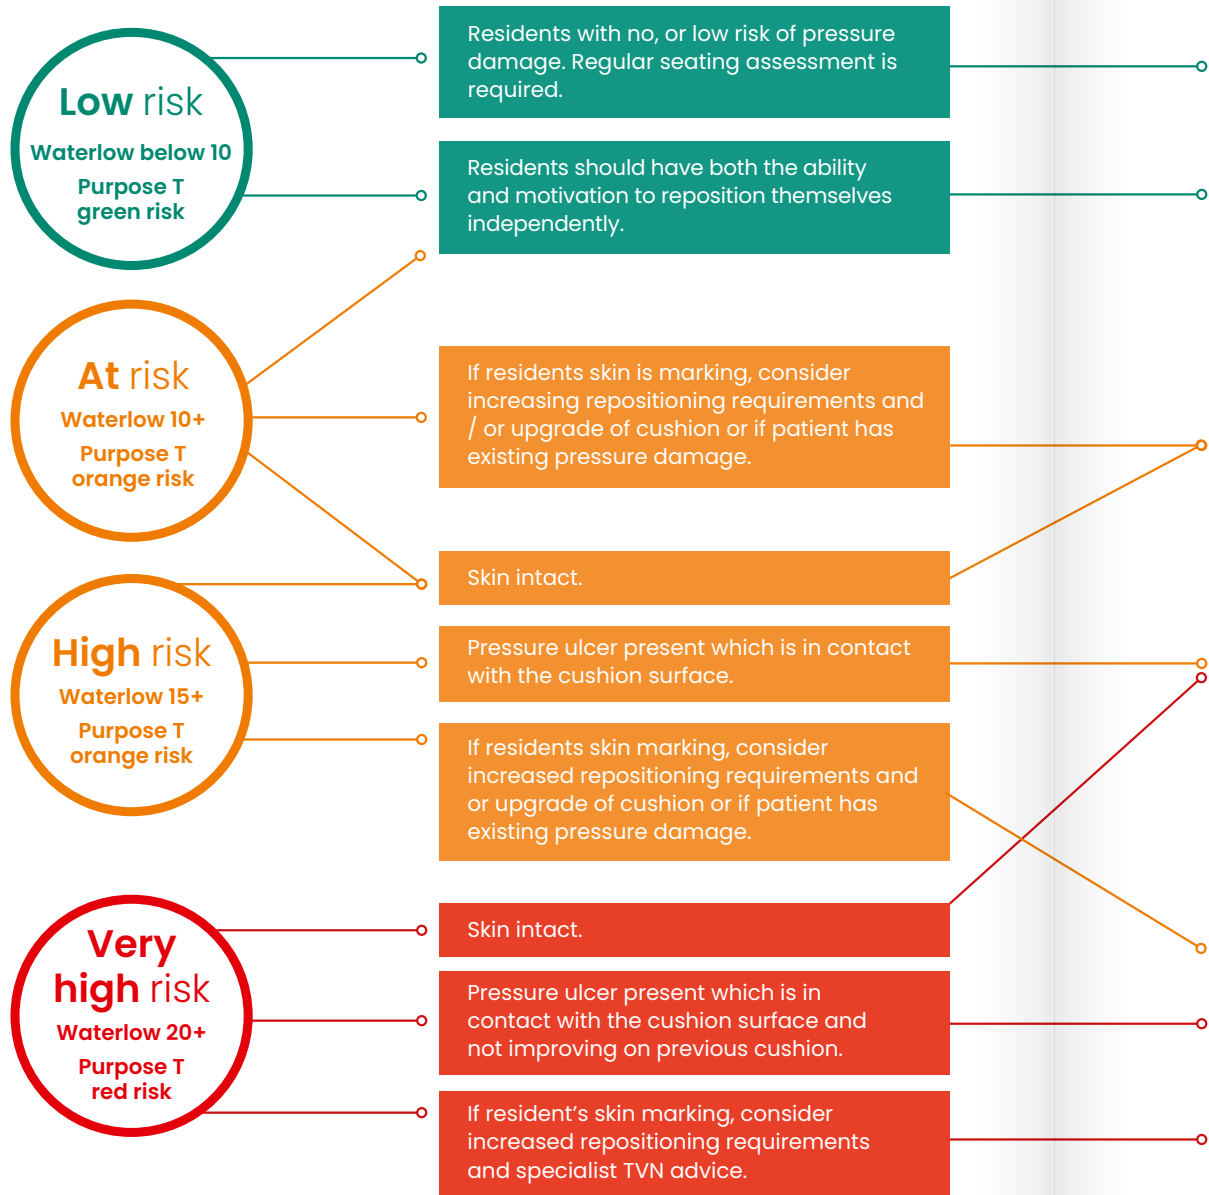

Allevia®

A range of pressure care solutions **to meet all needs**

- Pressure-relieving mattresses for every level of pressure damage risk
- Off-loading seat cushions for integration with the **Configura** chair range

Choosing the right cushion

Allevia[®]Visco
Static memory foam cushion

Weight limit: 160 kg (25 st).

Allevia[®]Visco
Static memory foam cushion

Weight limit: 160 kg (25 st).

OR

Allevia[®]Duo Cushion
(without pump or static air)

Weight limit: 160 kg (25 st).

Allevia[®]Duo Cushion
(with pump on alternating)

OR

Allevia[®]CushionAir

Seating flowchart according to risk assessment, clinical judgement and taking into account essential considerations.

Understanding how the Accora Configura chair can support you

Accora chairs are designed to offer comfort and pressure reduction. They are set up to suit the needs of an individual to be at the right size, depth and height for that person. They have an integral pressure-reducing cushion which has the option to be changed as well.

One particular benefit of using seating with integral pressure-reducing cushions, is that it **does not** negatively impact on the height of the seat in relation to the user.

Adding a cushion onto a seat can elevate the seating position of an individual and may even lift their feet off the floor thereby increasing risk of sliding down the chair. With the **Configura**, it removes the risk of a topper cushion sliding around or being ill-fitting to the chair and the individual. This allows for the addition of a higher specification of pressure-reduction.

Recommended for clients at risk of developing pressure damage

The Visco cushion is a static, pressure-reducing cushion for clients who are at risk of developing pressure damage but whose skin is intact. The Visco cushion is standard in all our chairs, the below table gives details on each.

	Lite 2, Comfort, Solus and Advance	Bariatric
Removable core	Yes	No
Aperture size	17.5 x 17.5 x 3"	
Weight capacity	25 stone	40 stone or 50 stone
Warranty	2 years	2 years

Allevia® Duo Cushion

The hybrid cushion suitable for all Configura chairs

The cushion is a hybrid, so it can be used in various configurations to achieve the level of pressure relief that is required for the client. The cushion can be used with a pump, static valve and on its own. The cushion has been designed to fit in the cushion aperture on the Lite 2, Comfort and the Advance.

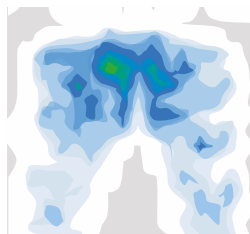

A total of 8 cells with foam inside gives **greater stability** and pressure relief.

Battery and mains powered pumps

Map with cushion alternating

Size	430 mm x 430 mm (17" x 17")
Weight capacity	25 stone (160 kg)

Fire retardancy	BS EN 7177 Medium hazard (ignition sources 0, 1 and 5)
Vapour permeable	✓
Zip	✓
Waterproof	✓

Allevia® CushionAir

Recommended for users who have developed pressure damage

The **CushionAir** cushion is a dynamic pressure relieving cushion which is normally recommended for users who have developed pressure damage. The principle is that the cells of the cushion inflate and deflate alternately. This provides pressure redistribution via cyclic changes in loading and unloading.

Cells of the cushion **inflate and deflate alternately**.

Battery and mains powered pumps

Part number	KITCA-0-CM1-100 (mains powered)	KITCA-0-SC1-000 (battery powered)

Choosing the right mattress

Allevia Comfort / FirmEdge
High specification foam. **Weight limit:** 168 kg (25 st)

OR

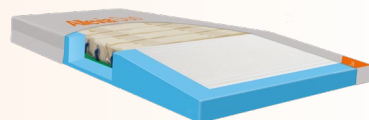

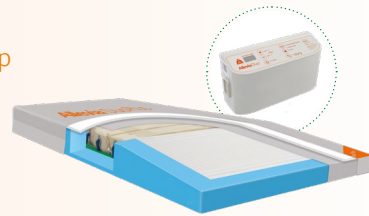

Allevia Prima
High specification foam heel slope mattress. Foam wall edges to aid transfers. **Weight limit:** 168 kg (25 st)

Allevia Duo / Duo Plus without pump
Consider mobility/activity, time spent in bed and impact of mattress on independent movement. Foam wall edges to aid transfers. Adjustable weight setting for pressure and comfort levels. **Weight limit:** 248 kg (39 st)

OR

Allevia Duo / Duo Plus with pump
Consider mobility/activity, time spent in bed and impact of mattress on independent movement. Foam wall edges to aid transfers. Adjustable weight setting for pressure and comfort levels. **Weight limit:** 248 kg (39 st)

Allevia Sense
Dynamic Replacement Alternating Air Mattress with Heel Slope. Auto weight sensor, seating mode if required. **Weight limit:** 249 kg (39 st)

Allevia® Comfort

A high quality mattress suitable for low to medium risk residents

This mattress has a base layer of high-density foam for support, with a top layer of soft, pressure-reducing visco foam. The cover is made of four-way stretch, vapour permeable fabric, for additional comfort.

Size	2000 x 900 x 150 mm (79 x 35 x 6") 2000 x 1050 x 150 mm (79 x 41 x 6")
Weight capacity	160 kg (25 st)
Warranty	2 years
Cover	Four-way stretch PU
Fire retardancy	BS EN 7177 Medium hazard (Ignition sources 0, 1 and 5)
Vapour permeable	✓
Layered foams	✓
Zip	✓
Water resistant	✓

Allevia® Comfort FirmEdge

Designed for additional support when side rails are used

The **FirmEdge** on the sides and ends of the mattress offers more support for transfers, and helps service users orient themselves in the bed. The **FirmEdge** also reduces the gaps between the mattress and head and foot board, to help reduce any risk of entrapment. This mattress is suitable for use with children when used with **Junior Kit**.

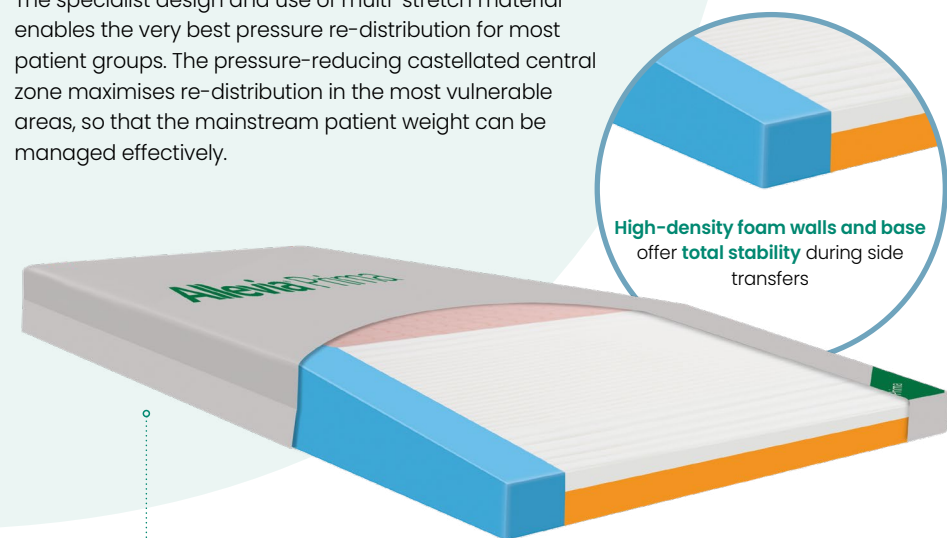

Size	1950 x 900 x 150 mm (77 x 35 x 6")
Weight capacity	160 kg (25 st)
Warranty	2 years
Cover	Four-way stretch PU
Fire retardancy	BS EN 7177 Medium hazard (Ignition sources 0, 1 and 5)
Vapour permeable	✓
Layered foams	✓
Zip	✓
Water resistant	✓

Allevia® Prima

Featuring a castellated foam surface with a specialist heel management area

The specialist design and use of multi-stretch material enables the very best pressure re-distribution for most patient groups. The pressure-reducing castellated central zone maximises re-distribution in the most vulnerable areas, so that the mainstream patient weight can be managed effectively.

High-density foam walls and base offer **total stability** during side transfers

Size	2000 x 900 x 150 mm (79 x 35 x 6") 2000 x 1050 x 150 mm (79 x 41 x 6")
Weight capacity	168 kg (26 st)
Warranty	2 years
Cover	Four-way stretch PU
Fire retardancy	BS EN 7177 Medium hazard (ignition sources 0, 1 and 5)
Vapour permeable	✓
Layered foams	✓
Zip	✓
Water resistant	✓

Four-way stretch **vapour permeable** cover

Allevia® Duo

Suitable for medium to very high-risk residents

This mattress uses a step-up/step-down hybrid foam system with extra quiet pump (when used as dynamic mattress), and foam-filled alternating cells which provide comfort as well as therapy. The mattress can also be used without a pump for high-risk residents, and features a clinically proven heel slope to help minimise heel surface contact. This mattress is suitable for use with children when used with **Junior Kit**.

Slopes to 90 mm (3.5 in) at heel end to **minimise heel surface contact**

Size	2000 x 900 x 150 mm (78.7 x 35.4 x 6")
Weight capacity	248 kg (39 st)
Warranty	Pump 2 years, mattress 5 years
Cover	Four-way stretch PU
Vapour permeable	✓
Layered foams	✓
Zip	✓
Water resistant	✓

Clinically proven results

Allevia® Duo Plus

The hybrid pressure management mattress with heel slope for the most dependent residents

This mattress uses a step-up/step-down hybrid foam system with extra quiet pump (when used as dynamic mattress), and foam-filled alternating cells which provide comfort as well as therapy. The mattress can also be used without a pump for high-risk residents, and features a heel slope to minimise surface contact and a top layer of visco foam for comfort.

Size	2000 x 900 x 160 mm (78.7 x 35.4 x 6.3") 2000 x 1050 x 160 mm (78.7 x 41.3 x 6.3")
Weight capacity	248 kg (39 st)
Warranty	Pump 2 years, mattress 5 years
Cover	Four-way stretch PU
Fire retardancy	BS EN 7177 Medium hazard (Ignition sources 0, 1 and 5)
Vapour permeable	✓
Layered foams	✓
Zip	✓
Water resistant	✓

Clinically proven results

Allevia® Sense

Suitable for high to very high risk residents

This mattress uses a dynamic mattress system with alternating cells for pressure relief. The cells are 18 cm deep to provide deep immersion, and the heel slope is created by lower heel cells. The auto weight pump features an adjustable comfort setting with the option of constant low pressure therapy. This mattress also features an ultra rapid CPR valve.

Size	2000 x 900 x 190 mm (79 x 35 x 7.5") 2000 x 1050 x 190 mm (79 x 41 x 7.5")
Weight capacity	249 kg (39 st)
Warranty	2 years
Cover	Four-way stretch PU
Vapour permeable	✓
Layered foams	n/a

Auto weight / pressure set pump unit

EMPRESA®

Exceptional clinical outcomes and improved safety

- Featuring dynamic **BodyMove™** system
- Pre-programmed “one-touch care”
- Available in a variety of wood finishes and upholstery

EMPRESA

Your choice of nursing bed doesn't need to be a compromise

Even with the diverse demands of clinical care, staff and resident safety, and efficiency – we've managed to bring these all together in the **Empresa** bed. Incorporating essential clinical features to aid safe nursing and residents' independence, the **Empresa** bed has people at the heart of its design.

Overall dimensions	1015 x 2090 mm (40" x 82.3")
Mattress size standard width	900 mm width x 2000 mm length (36" x 80")
Mattress size with width extension	1050 mm width x 2000 mm length (42" x 80")
Mattress size with length extension	2200 mm length (84")
Safe working load	275 kg (43 st)
Patient weight	240 kg (38 st)
Mattress platform height	100 – 800 mm (3.9" - 31.5")
Profiling functions	BodyMove technology
Part number	NSB-0-FL6-000

Empresa features

Pressure care

90 mm | 60 mm

- **BodyMove** technology accommodates the natural way the body lengthens when changing from supine to sitting position

- Auto-regression of mattress platform supports pressure distribution
- Improved comfort with reduced shear forces

Empresa accessories

Folding side rails with bumpers

Lifting pole

Bed lever

High safety mat

Folding side rails raised

Fabric side rails raised

1050 mm width extension

Proxima

Advanced falls management for acute care

The **Proxima** is not only an invaluable part of your risk management toolkit when safeguarding against falls, it also helps facilitate safe transfers and reduces patient handling. The **Proxima** features smooth, easy-clean surfaces that inhibit the ingress of fluids, and integrated wiring that supports infection control and prevention.

Overall dimensions	1015 x 2090 mm (40" x 82.3")
Mattress size standard width	900 mm width x 2000 mm length (36" x 80")
Mattress size with length extension	2200 mm length (88")
Safe working load	275 kg (43 st)
Patient weight	210 kg (33 st)
Mattress platform height	115 – 815 mm (4.5" - 32")
Profiling functions	BodyMove technology
